Resolution of Support

Whereas Ranger Solar proposes to construct a utility-scale solar array on lower Carver Street, a seldom-traveled section of unpaved road within the Town of Brandon, and

Whereas Ranger Solar has communicated with town officials, boards, and citizens in a transparent and proactive manner beyond any legal requirements, and

Whereas Ranger Solar has sited this array to the benefit of the Town and its residents and visitors in an unobtrusive location not within the Route 7 or Route 73 gateway viewsheds, and

Whereas Ranger Solar listened to concerns expressed by members of the public and altered their design to address those concerns through amelioration of wetlands and wildlife impacts, and

Whereas the proposed solar array as designed will be located entirely outside the 100-year flood limit of the Otter Creek as well as include wildlife corridors through the array field, and

Whereas the Brandon Selectboard finds that the proposed solar array is consistent with the Solar Energy provisions of the Brandon Town Plan, and

Whereas the Brandon Selectboard finds that the proposed project will provide a positive economic benefit to the taxpayers of the Town of Brandon, including increased tax revenue from land coming out of Current Use to host this project, and

Whereas the proposed solar array creates renewable energy, and as recently as January 13, 2016, the State of Vermont was reported by the Associated Press as re-affirming its commitment to getting 90% of its energy from renewable sources by the year 2050, including 67% of its electric power by the year 2025, now, therefore,

Be it resolved that the Brandon Selectboard officially supports Ranger Solar's proposed solar array in this town, and

Be it further resolved that the Brandon Selectboard submit a copy of this resolution to the Vermont Public Service Board and request consideration of our support in their evaluation of the application of Ranger Solar's Brandon Solar Array for a certificate of public good.

By the Selectboard of the Town of Brandon
