

July 14th, 2017

EDF EN Canada Development Inc.
 53 Jarvis Street, Suite 300
 Toronto, ON M5C 2H2

Customized Energy Solutions has been engaged by EDF EN Canada Development Inc. (“ECDI”) to express an opinion on the likelihood of successful registration of the upcoming Maine, United States sited Timberline 2 Wind Project (“Resource”), currently under development, as a Class 1 resource with the Massachusetts Department of Environmental Resources (DOER) based on current market rules. We have reviewed the accompanying project documents for the Resource as of July 14th, 2017, and other related resource specific information (as detailed in the table below).

Generator Unit Name	Timberline Wind Project
Technology	Wind
Location	Maine, United States
Developer	EDF EN Canada Development Inc.
Anticipated COD	2022
Point of Interconnection	Larrabee Road, Maine
Off taker	MA serving Distribution Companies: Unitil Corporation, National Grid, and Eversource Energy.
Project Capacity	149 MW

Upon review of project specific information provided and applicable Massachusetts Renewable Portfolio Standard (“RPS”) regulations (DOER 225 CMR 14.00) currently in effect, we anticipate that the Resource will successfully meet all eligibility requirements associated with RPS Class 1 certification.

The timeline for the DOER review and approval process for projects within the ISO-NE control area is typically completed within 30 days of submission of an accurate and complete Statement of Qualification Application (“SQA”). There are no costs imposed by DOER associated with the submission of SQA, with the exception of translation costs where the documentation supplied is in a language other than English.
