\*Please note that on September 7, 2023, Eversource Energy publicly announced in a Form 8-K filed with the U.S. Securities and Exchange Commission that it closed its sale of all of its interests in uncommitted offshore wind lease areas, consisting of approximately 175,000 developable acres located 25 miles off the south coast of Massachusetts, to Ørsted for \$625 million in an all-cash transaction, which had been previously announced on May 25, 2023 (the "Transaction"). While Eversource initially created and posted a "Bid Team roster" in connection with the Massachusetts 83C Round 4 solicitation process prior to the announcement of the Transaction, out of an abundance of caution and to ensure complete transparency, Eversource did not in fact establish a Bid Team, does not currently have a Bid Team, and is not currently participating as a bidder in the Massachusetts 83C Round 4 solicitation process due to the Transaction. Accordingly, Eversource has removed the Bid Team roster from this posting.
