Subject: Green Bridge Corporation, 230 Brooks Street Solar – Proposed Plan Application (PPA) – NEP-26-GNF05

Dear Ms. Vandal,

This letter is to inform you that, pursuant to review under Section I.3.9 of the ISO Tariff, no significant adverse effect has been identified with regard to the following PPA:

NEP-26-GNF05 – Generator application from New England Power on behalf of Green Bridge Corporation for the 4.998 MW Solar PV facility in Worcester, MA and interconnecting to 230 Brooks Street, Worcester, MA via feeder 24W2 out of Greendale Substation. The proposed in-service date is May 1, 2028. The Reliability Committee (RC) reviewed the materials presented in support of the proposed project and did not identify a significant adverse effect on the reliability or operating characteristics of its transmission facilities, the transmission facilities of another Transmission Owner or the system of any other Market Participant.

Having given due consideration to the RC review, ISO New England has determined that implementation of the plan will not have a significant adverse effect upon the reliability or operating characteristics of the Transmission Owner's transmission facilities, the transmission facilities of another Transmission Owner, or the system of a Market Participant. A determination under Section I.3.9 of the ISO Tariff is limited to a review of the reliability impacts of a proposed project as submitted by Participants and does not constitute an approval of a proposed project under any other provisions of the ISO Tariff.

Sincerely,

/s/ Alex Rost

Alex Rost
